**INTRODUCING WEB GALLERY WIZARD PRO, VERSION 1.4: PHOTO GALLERY CREATION SOFTWARE OFFERS DIGITAL CAMERA USERS A NEW WAY TO SHARE PHOTOS**

*New Version 1.4 Enables Users to Create their own Photo Album Web Pages without HTML Knowledge, and Post them Online to Any Web Host with just a few Clicks*

**Bellevue, WA, January 11, 2006** – KOMOTION, Inc, a leading developer of Web gallery creation software, today announced the release of Web Gallery Wizard™ PRO 1.4, the essential new tool for digital photo enthusiasts who want to create photo album Web pages quickly, with a custom-designed look. Powerful enough for professionals, yet easy enough for consumers, Web Gallery Wizard PRO is used by digital photographers who want to showcase their images, maintain control over their Web Galleries and ensure the safety of their photos.

“Better than other software in its category, Web Gallery Wizard PRO generates photo Web galleries faster and easier with results superior to other Web page generators,” said Razvan Neagu, President and CEO of KOMOTION. “The interchangeable themes are professionally designed and included at no additional cost. Because it enables users to maintain control over all their generated files and viewers don’t need to register to see the site, Web Gallery Wizard PRO is a popular alternative to online photo sharing sites. For anyone who wants to try our software, we offer a free trial download available from our website at <http://www.webgallerywizard.com/go/>.”

The new version of this award-winning software is now fully compatible with all major Internet browsers including Firefox®, Internet Explorer, Netscape® and Opera. Version 1.4 also supports new functionality that enables viewers to move more easily through photos using Prev/Next/Home and Slideshow buttons, and to view intro page Flash animations.

**About Web Gallery Wizard PRO 1.4**

Creates Web Galleries in minutes -- In just a few simple steps – no HTML knowledge required -- the wizard generates a Web Gallery, ready for posting online to any Web host. Users simply import and arrange photos into albums, write image captions and album descriptions, select from several built-in professionally designed themes, or browse more free themes available online. They name the gallery and generate it with the click of a button. It’s that easy.

Provides an exceptional viewer experience -- Web Galleries created with Web Gallery Wizard PRO are visually appealing, personalized and hold virtually unlimited albums and photos. With QuickView™ navigation, available only on Web Gallery Wizard products, image viewing is a breeze. Albums are indexed on one page and accessed with one click; no more linear, photo-by-photo clicking to find that great shot. No switching between windows; scrolling is kept to a minimum. Just select any thumbnail and the image appears conveniently in the showcase frame on the same page. Click the Slideshow button to view a self-running, photo-by-photo automatic loop. Web Galleries also feature animated intros and a high resolution image option for printing.

**KOMOTION Introduces Web Gallery Wizard PRO 1.4**  
**January 11, 2006**  
**Page Two**

Offers security and control -- Web Galleries are generated on the user's computer and not dependent on changing restrictions imposed by Web hosts. The user has complete control of the Web Gallery and their choice of Web hosts. Intrusions can be kept to a minimum with no ads, pop-ups or spam. Viewers don't need to register to see a Web Gallery; they simply navigate their browser to the Web Gallery's Web site.

**Web Gallery Wizard PRO 1.4 is available now**

To find out more, view a sample Web Gallery, purchase the software for yourself or as a gift, or to download a free trial, go to <http://www.webgallerywizard.com/go/>. Web Gallery Wizard PRO 1.4 supports all major Web browsers and image formats and was designed for Microsoft® Windows® XP, 2000, ME, 98, NT4, 2003. The software is priced at just \$39.95.
